7362 E State Route 106 / Union, WA

TO REGISTER:

Go to: [harmonyhill.org/wellness/
wellnessretreats/](http://harmonyhill.org/wellness/wellnessretreats/)

At the end of this workshop all
participants will be able to:

- Identify survivorship patient
populations in various practice settings
- Name accreditation & regulatory
bodies that are addressing survivorship,
& the criteria for incorporating
survivorship care into practice
- Describe strategies for
implementation of patient specific
survivorship strategies into various
practice settings
- Describe practices for self-care, self-
reflection, and burnout prevention for
providers of survivorship care
- Name 2 new colleagues that can
become a valuable part of your
professional network

Workshop Leader

Leslie Heron is a Masters prepared Family Nurse Practitioner with board certifications in Family Practice and in Integrative Nurse Coaching. A graduate and faculty member of the University of Washington, Leslie is well known for her work in cancer survivorship at Seattle Cancer Care Alliance and Fred Hutch in Seattle. Leslie is also a well known public speaker who has given presentations on: survivorship care planning, the impact of cancer on intimacy and sexuality, and transdisciplinary patient centered approaches to survivorship care.

In 2014 Leslie co-founded the Cancer Survivorship Provider Network, a national network of professionals collaborating to provide patient centered care for cancer survivors. She was the founder and chair of the Transitions Project, a multidisciplinary collaborative with participants from Fred Hutch Cancer Research Center, Seattle Cancer Care Alliance, Seattle Childrens Medical Center, and the University of Washington Medical Center. This collaborative group focused on creating smooth transition for pediatric cancer survivors as they moved into adulthood, while also addressing care coordination over the life span.

Leslie will lead this retreat as both a plenary speaker and group facilitator, offering her knowledge and wisdom as she assists participants to expand their knowledge and the application of that knowledge in creating excellent survivorship programs that both meet regulatory requirements, and the needs of patients and their care companions.

Our hope is that this offering will allow all participants to make their optimal contribution in the cancer survivorship arena while also attending to their own needs for care and healthy living. Please join us for this retreat!
